ACHIEVEMENTS

- Passed Cambridge English Language Assessment and got a C1 grade (*2021*)
- Prize winner of the Russian National Olympiad in Informatics (*2022*)
- CodeForces Master - top 1% of all the programmers on this website (*Present*)

PROJECTS

TasksCheckingBot Created a telegram bot which can help in building the system of homework tasks checking. Teachers can add different homework tasks, see the results and statistics for every student. Students have an user-friendly interface to send tasks and see their own results. ([See the project](#)) *2023*

API for School Electronic Journal Wrote special library which allows to load information from the school electronic journal. For example, users can find out homework tasks that they have or the timetable for the next day. So it was sort of the API for that diary. ([See it here](#)) *2020*

OlimpPlus Created a special website which can significantly ease your process of preparing for the olympiads. You can see a list of all popular olympiads, add them to your account, so that the service will send you a few notifications before the event. Also, there is an archive of tasks to each olympiad, for you to get ready for such competitions more effectively. ([You can see it here](#)) *2019*

PocketMap Built a project for learning geography. Users can choose different geographic objects and gain information about them. ([See it here](#)) *2018*
